Subject: Meeting with Mayor DonCarlos (Baytown, TX); Re: San Jacinto River Waste Pits Superfund Site

UPDATE: See Meeting Specifics just provided! Call-in: (b) (6) /Code: (b) (6)

Meeting: Mayor Stephen DonCarlos (Beytown, TX)

Re: San Jacinto River Waste Pits Superfund Site and current EPA actions to address this site

Accompanying the Mayor: Danielle McBeth (Alcalde & Fay – copied above)

Lead Offices: -Region VI; -OLEM's Office of Superfund Remediation & Technology Innovation

Note: Region VI had a meeting with the public and elected officials on February 17 regarding the Agency's response to the news articles cited.

Note: The city's Washington rep just provided some additional details for the 3/22 meeting so here are helpful specifics:

- \* Baytown Mayor Stephen DonCarlos would like to discuss full remediation/removal of the San Jacinto Waste Pits to protect residents, wildlife and natural resources for future generations in the east Houston/Baytown area.
- \* In early December 2015, a dive team discovered a large hole in the structure designed to contain toxic waste at the San Jacinto River Waste Pits Superfund Site.
- \* EPA Region 6 instructed companies responsible for the waste to submit a repair plan for the protective cap that would include confirmation sampling to ensure that no toxic materials were coming through the hole in the structure.
- \* The armored cap was placed on the submerged pits in 2011 and simple repairs have been needed since that time but no damage has been as extensive as the hole that measures "20-feet long and 10-feet deep and is on the northwest portion of the site."
- \* The waste results from a Pasadena paper mill that deposited its waste along the San Jacinto River 50 years ago. According to news reports, the waste, from compounds once used to whiten paper, is highly toxic and the EPA has stated that "there is no safe level of exposure to the chemicals, which are known to cause cancer and disrupt reproductive and immune systems."
